

IRE Position Opening Shift Laboratory Technician

Illinois River Energy has an immediate opening for a Shift Laboratory Technician. The Shift Laboratory Technician is responsible for performing chemical and biological analytical testing and calibrations to support reliable, efficient, and high throughput operations and to ensure strict quality control standards are met on all products. A successful candidate for this position must possess good communication skills and be able to convey laboratory results to Operations personnel.

This position is nights with a schedule that requires working 4 days on, 4 days off, 12 hours per day. Occasional overtime is required. Therefore, the person in this position must have flexibility in their schedule

To qualify for this position the successful candidate must have:

- Minimum of one year of work experience with fermentation and/or distillation processes in industry or academia
- Associates Degree in Chemistry, Biology or related technical field
- Expertise with Microsoft Office products (Word, Excel, Access and Outlook)
- Must have knowledge of the basic principles and have demonstrated capability to quickly gain proficiency in the usage, maintenance, and user-level programming of new computerized laboratory equipment

Qualifications preferred:

- Experience in a dry-mill ethanol refinery laboratory
- Bachelor of Science in Chemistry, Biology or related technical field
- Some formal education in fermentation and distillation processes in a dry-mill ethanol refinery

To request an application, please contact the Office of Human Resources at 815-561-3551 or submit a resume via email at klyle@illinoisriverenergy.com. Position is open until filled.
